

2.583ct SI1/L Round Brilliant cut diamond

photo6.png

This EGL certified 2.583ct SI1/L Round Brilliant cut diamond has no black pinpoint inclusions visible to the naked eye!!! Massive stone - Showing up like a "J-K" very little yellow tint noticable to the naked eye. It's a phenomenal colour "L" whitest "L" I've seen in this size - Big stone and VERY well priced! Exceedingly rare to see a diamond show up like this, very strong cert.

Description As No diamond is the same, every single one of our diamonds are hand selected for colour and clarity, each diamond is eye clean, that is to say no visible inclusions to the naked eye. We go through thousands of options to find only the best in each range.

Additional:

- Diamond Certificate Included
- Appraisal for Insurance purposes Included
- Shipping included

FOR EXAMPLE: No SI2/J diamond is the same, that's why going through hundreds of SI2/J diamonds means we can select the whitest, brightest and most eye clean diamond.

Only one of each available in stock.

FAQ: Why is each SI2/J not the same? It's been graded as an SI2/J, why does it not look like all the other certified SI2/J.

This is because the clarity grading Si2, refers to the number of inclusions and not necessarily to placement of the inclusions. If for example a diamond has an inclusion on it's table(Surface). It would be immediately noticeable to the naked eye! If the inclusion was situated towards the culet(Bottom), It would not be visible to the naked eye. Only through having a huge selection of diamonds can you hand pick the best of the best.
