Description As No diamond is the same, every single one of our diamonds are hand selected for colour and clarity, each diamond is eye clean, that is to say no visible inclusions to the naked eye. We go through thousands of options to find only the best in each range.

FOR EXAMPLE: No SI2/J diamond is the same, that's why going

Additional:

- Diamond Certificate Included
- Appraisal for Insurance purposes Included
- Shipping included

through hundreds of SI2/J diamonds means we can select the whitest, brightest and most eye clean diamond.

Only one of each available in stock.

FAQ: Why is each SI2/J not the same? It's been graded as an SI2/J, why does it not look like all the other certified SI2/J.

This is because the clarity grading Si2, refers to the number of inclusions and not necessarily to placement of the inclusions. If for example a diamond has an inclusion on it's table(Surface). It would be immediately noticeable to the naked eye! If the inclusion was situated towards the culet(Bottom), It would not be visible to the naked eye. Only through having a huge selection of diamonds can you hand pick the best of the best.
